1. Software Overview

Ai Script Assist is a software to assist in the execution of the Illustrator of the script.
If you are using Illustrator in the business, we are working to streamline perform frequently used functions and operations towards the heavy users in the script. Unfortunately Illustrator can not assign a script to a shortcut key. Once you run the shortcut key, it will increase further efficiency. By using Ai Script Assist, you will be able to script execution in the shortcut key on the Illustrator. Also, paste of plain text can be run on the shortcut key. It can also be used as a script launcher.

※ Adobe Illustrator is a trademark of Adobe Systems Incorporated.

※ Windows is a registered trademark of Microsoft Corporation.

※ Other company names are listed, product names, trademarks

and registered trademarks of their respective owners.

※ Ai Script Assist is not Adobe Systems products.

2. Operating environment

Windows7 since the 64-bit version, Adobe Illustrator,
Use a PC that has been installed.
UI language supports Japanese, English.
There is no limit to the language of the script file.

3. Install / Uninstall

■ **How to install**
Ai Script Assist.zip unzip the file, copy it to a folder for each appropriate location
Please. The trial version can not run the script on the shortcut key.
Other features are available. Restriction release decompresses the Keyboard.zip in the folder in the issued password, the Keyboard.dll in the same folder as the AiScriptAssist.exe
Place. Script execution function of the shortcut key is enabled.

■ **How to uninstall**
Please remove the software installation folder.
※ This software does not create the information registry, in other folders.

４． How to use

The following screen is displayed when you run the AiScriptAssist.exe to start the software.

■ **Procedure of registration ~ shortcut execution of script file, paste plain text**

1. Register in the "script registration" button ".jsx script file".
   Script that support is the only Java script.

2. Register the shortcut key.
   Be careful not to overlap with the shortcut keys that are registered in Illustrator.

3. After starting Illustrator, the button "Enable the shortcut key execution of the script."
   And press. In a state in which the Illustrator is running, if you start the software
   Automatically "shortcut key execution of the script" is enabled.

4. Make the execution of using the shortcut key script on Illustrator.
   Shortcut key is valid only on the Illustrator.

5. Enter the task tray and icon of the software.
   While working in Illustrator does not get in the way when iconified.

6. For "Paste plain text" script
   Copy the text in Illustrator, it is also copied attributes when you paste.
   When you run this script you can paste the plain text without attributes.
   Shortcut key, set the key of your choice.
