Installation

1.) Before installing, it's best that you have the items below prepared:

- **Domain Name**
- **Web Host (With PHP 5 Installed)**
- **Your web hosting FTP login details.**

2.) To install the script on your server, simply run the application: **ECBS_Pro.exe** and follow the steps provided in the wizard.

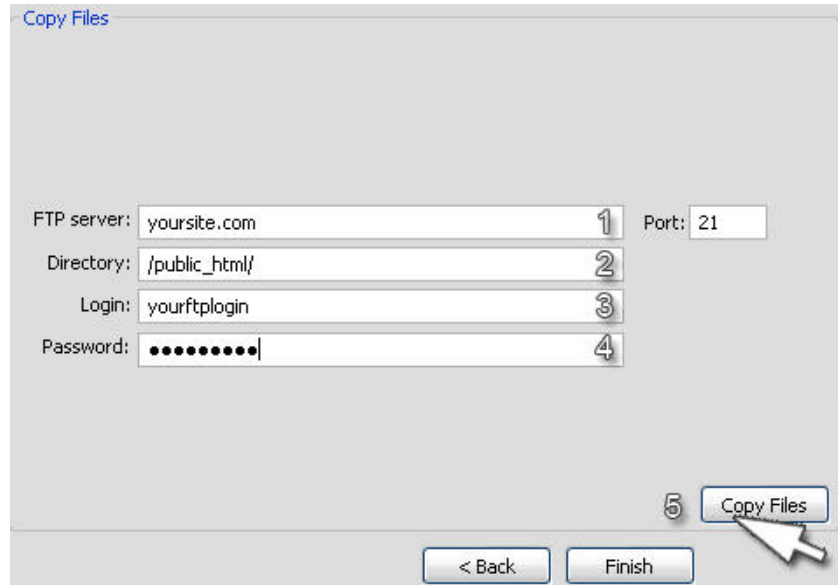

You will be asked a series of questions, where you can answer according to your needs of this program.

Upon reaching the final step, you can then use the built in FTP to upload to your site. Enter your details for:

1. **Your FTP server**
2. **Directory:- Campaign Ignitor In The Root Directory**
-IF you are installing the script in the root directory, just enter the root directory for example **/public_html/**

Uploading

1. **Login**
2. **Password**
3. Click the "**Copy Files**" button to initiate the upload.

During FTP upload (Final step) you may encounter a Windows warning prompt that asks you if you would like to Block the FTP access. Simply choose "**Unblock**" to allow ftp upload. You are only required to do this once as Windows will remember your selection for this application.

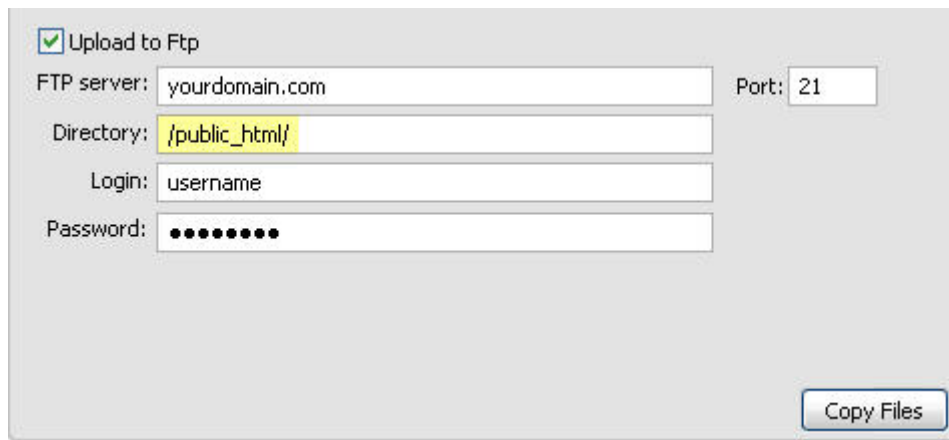

Directory Types

There are three common types of directory or domains for installation. **Choose one** that best suits your needs.

- [Installing into a Top Domain](#) /Root Directory (**Recommended**) Click [here](#) if you are installing it in the root directory meaning that your domain does not share under any other domains. Usually the top domain.
- Installing Into An "[Add On](#)" Domain/Directory With FTP Access
- Installing Into An "[Add On](#)" Domain/Directory **WITHOUT** FTP Access

Installing In Root Directory

-IF you are installing the script in the root directory, just enter the root directory for example **/public_html/**

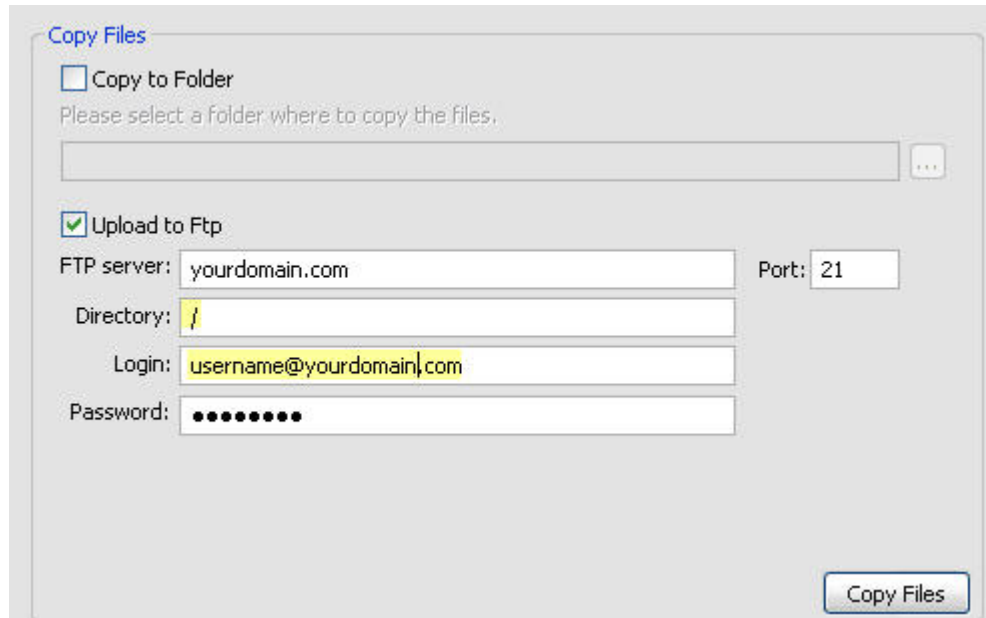

A screenshot of a web-based FTP upload configuration form. At the top left, there is a checked checkbox labeled "Upload to Ftp". Below this, the form contains four input fields: "FTP server:" with the value "yourdomain.com", "Port:" with the value "21", "Directory:" with the value "/public_html/" (highlighted in yellow), and "Login:" with the value "username". Below the login field is a "Password:" field filled with ten black dots. In the bottom right corner of the form, there is a button labeled "Copy Files".

Installing Into An Add On Domain Directory

Installing The Script Into A Sub-Domains/ Sub-Folders Or Add On Domains

WITH DIRECT FTP Access

-IF you are installing it into a sub-domain or add on domain and you have an **FTP account access for that particular folder only**, then enter it as / and the installer will automatically create a subfolder where the script will be installed.

The screenshot shows a 'Copy Files' dialog box with the following fields and options:

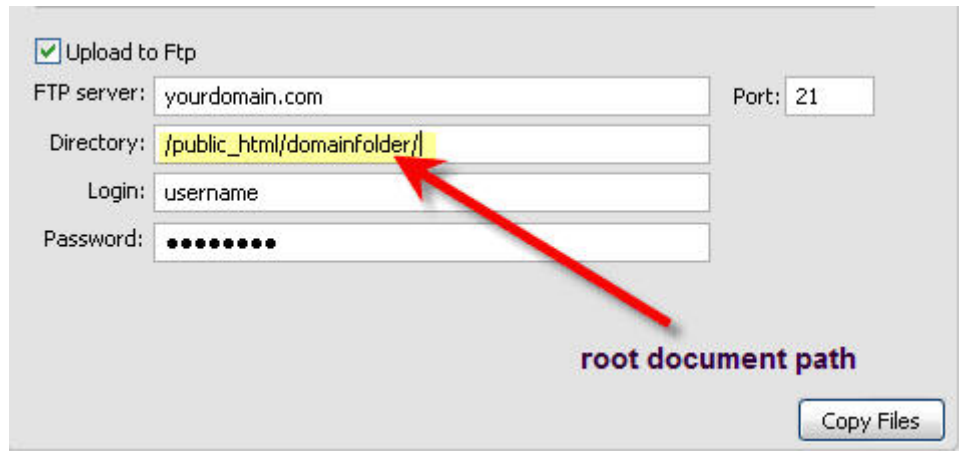

- Copy Files** (Title)
- ☐ Copy to Folder
- Please select a folder where to copy the files.
- ☒ Upload to Ftp
- FTP server: yourdomain.com
- Port: 21
- Directory: /
- Login: username@yourdomain.com
- Password:
- Copy Files (Button)

Installing In Sub-Domains/ Sub-Folders Or Add On Domains

Installing The Script In Sub-Domains/ Sub-Folders Or Add On Domains **WITHOUT DIRECT FTP Access**

-IF you are installing the script in a sub-domain or an add on domain that exist within a folder for another root domain and you do not have direct FTP access to that account or an FTP account was not created for that domain, then consult your web host provider on the document root path to the domain you have on their account. In the "Directory Field" enter it as:

`/home/yourrootdomainusername/public_html/domainfolder/`

The screenshot shows a web interface for uploading files to an FTP server. It includes a checkbox for "Upload to Ftp", fields for "FTP server", "Port", "Directory", "Login", and "Password", and a "Copy Files" button. A red arrow points to the "Directory" field, which contains the text `/public_html/domainfolder/`. Below the form, the text "root document path" is displayed.

☒ Upload to Ftp

FTP server: Port:

Directory:

Login:

Password:

root document path

Permission Settings/Chmodding

Once your files have been uploaded, run your browser and go to the installation folder and type in the URL to the chmod.php file:

e.g: <http://yourdomain.com/script/chmod.php>

This will change your permission settings for the template folder to 777 or whatever you have set for your default permission settings in the installer wizard.

After successfully changing the permission, you may safely remove the chmod.php file (for security) by using an FTP software.

Permission Settings Error

After you have uploaded the files to your server, go to:

<http://www.yourdomain.com/script/chmod.php>

This will automatically set the required files and folders to the permission required to run the script correctly

IF your server does not allow you to change the script via chmod.php method, you must change the permission settings manually by using an FTP program.

Chmod the following to write all e.g. 777 **ONLY** if your server returns errors when you run chmod.php.

If no errors found when you run chmod.php just delete it from your server using an FTP program.

ONLY SET THESE FILES AND FOLDER TO “WRITE ALL” PERMISSION IF YOUR WEB HOST DO NOT ALLOW YOU TO USE THE CHMOD.PHP METHOD ABOVE!

Files to set permissions:

ALL files and folders (including ALL files in sub-folders) in:

[/script/db/cbs/](#)

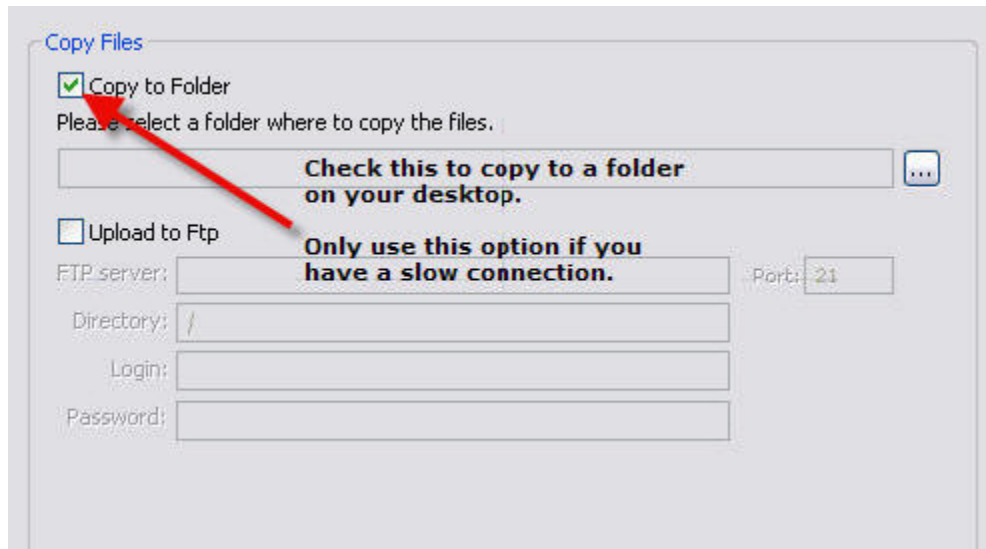

[/script/db/](#)

[/script/txtSQLAdmin/](#)

Missing File/Folder Errors After Upload

If you find any errors specifying some missing files, then the files might not be uploaded correctly because sometimes due to server timed out settings, the files may not get uploaded correctly. If upload fails or some files do not get uploaded correctly resulting in errors.

Please use the "Copy Files" function to copy the files to your desktop and use a FTP program to upload the files.

The screenshot shows a 'Copy Files' dialog box. At the top, the title 'Copy Files' is in blue. Below it, the checkbox 'Copy to Folder' is checked, and a red arrow points to it. Underneath, the text 'Please select a folder where to copy the files.' is followed by an empty text box and a button with three dots. To the right of the text box, the instruction 'Check this to copy to a folder on your desktop.' is displayed. Below this, the 'Upload to Ftp' checkbox is unchecked. To its right, the instruction 'Only use this option if you have a slow connection.' is shown. Further right, the 'Port:' label is next to a text box containing '21'. At the bottom, there are four input fields labeled 'FTP server:', 'Directory:' (containing '/'), 'Login:', and 'Password:'.

Running The Script

Now it's time to check that everything is working correctly. There are a series of tests to be carried out to make sure your database is functioning correctly.

Go to:

<http://yourdomain.com/script/admin.php>

And enter the username and password as:

Username: **admin**

Password: **admin**

The screenshot shows the 'EasyCBstore!' logo at the top with the tagline 'Search, Find.....Easy!'. Below the logo, the page is titled 'Admin Login'. There are two input fields: 'Username:' with the value 'admin' and 'Password:' with masked characters 'xoxoxox'. An 'Accept' button is located below the password field. The page has a blue header and a grey footer.

Once logged in, you'll be welcomed with the main page:

Click on all the links to make sure everything is working fine. If you see any errors, here's some possible causes:

- Your web host only have PHP 4 installed but this script requires PHP 5
- Check your permission were set properly for the files
- Check to see if any files or folders were not uploaded correctly. You can do so by exporting the script to your hard disk and compare with the one you have installed online. Then upload the files that are missing from the one online.

If you see no errors, then you're good to go.

Configuring Your Script

Click on the Configuration link on the left pane and you will be greeted with this:

Your Affiliate ID:

Google Adsense ID:

Use mod_rewrite:

You can change:

Admin Login: To your preferred user login name.

Admin Password: To your preferred login pass

Links per Page: Change this to the default number of links you would like to show on a page. I.E. when someone click the links under the main category, in the homepage.

Your Affiliate ID: Your clickbank affiliate ID. If you are not a ClickBank affiliate yet, you can sign up and get your ID here:

https://www.clickbank.com/promote_products.html

Google Adsense ID: Enter your Adsense ID here. If you're not an adsense publisher yet you sign up here:

<https://www.google.com/adsense/g-app-single-1>

Use mod_rewrite: Allows you to select between mod_rewrite or standard PHP link redirection. Only use mod_rewrite if your webhost allows it.

Save Button: Click this button once you have finished changing your config

Updating Your Database

This script already comes preloaded with 103 Categories that makes a total of 28157 links all embedded with your ClickBank affiliate ID, so initially you may not need to update your database, but overtime, as more products were being added to ClickBank's own marketplace, you may need to update your database so that it stays current.

To update your database, click the "Update DB" link and download the xml file by clicking on the link:

[marketplace feed v1.xml.zip](#)

The screenshot shows the EasyCBstore! website interface. The header features the logo "EasyCBstore!" with the tagline "Search, Find.....Easy!". The left sidebar contains a menu with the following items: Main Page, Update DB (highlighted in yellow), Configuration, Template, Sponsors, Edit Content, and LogOut. The main content area displays a red error message: "There is no marketplace_feed_v1.xml file in xml directory". Below this message, it says "Download link: [marketplace feed v1.xml.zip](#)". Two red arrows point to the "Update DB" link in the sidebar and the download link in the main content area. The right sidebar shows a list of categories and their link counts, with a total of 28157 links. The categories listed are: Fun & Entertainment (2809), Society & Culture (2249), Sports & Recreation (2035), Home & Family (3650), Money & Employment (5702), Business to Business (3001), Computing & Internet (1445), Marketing & Ads (2560), and Health & Fitness (4706). At the bottom of the right sidebar, it shows "Categories Total: 103" and "Sponsors: 3".

Category	Count
Fun & Entertainment	2809
Society & Culture	2249
Sports & Recreation	2035
Home & Family	3650
Money & Employment	5702
Business to Business	3001
Computing & Internet	1445
Marketing & Ads	2560
Health & Fitness	4706

Links Total: 28157
Categories Total: 103
Sponsors: 3

Once you have downloaded this file, unzip it to your desktop, then you will see something like this:

Then by using your favorite FTP program, you can upload both files to your /xml/ folder in your installed script directory.

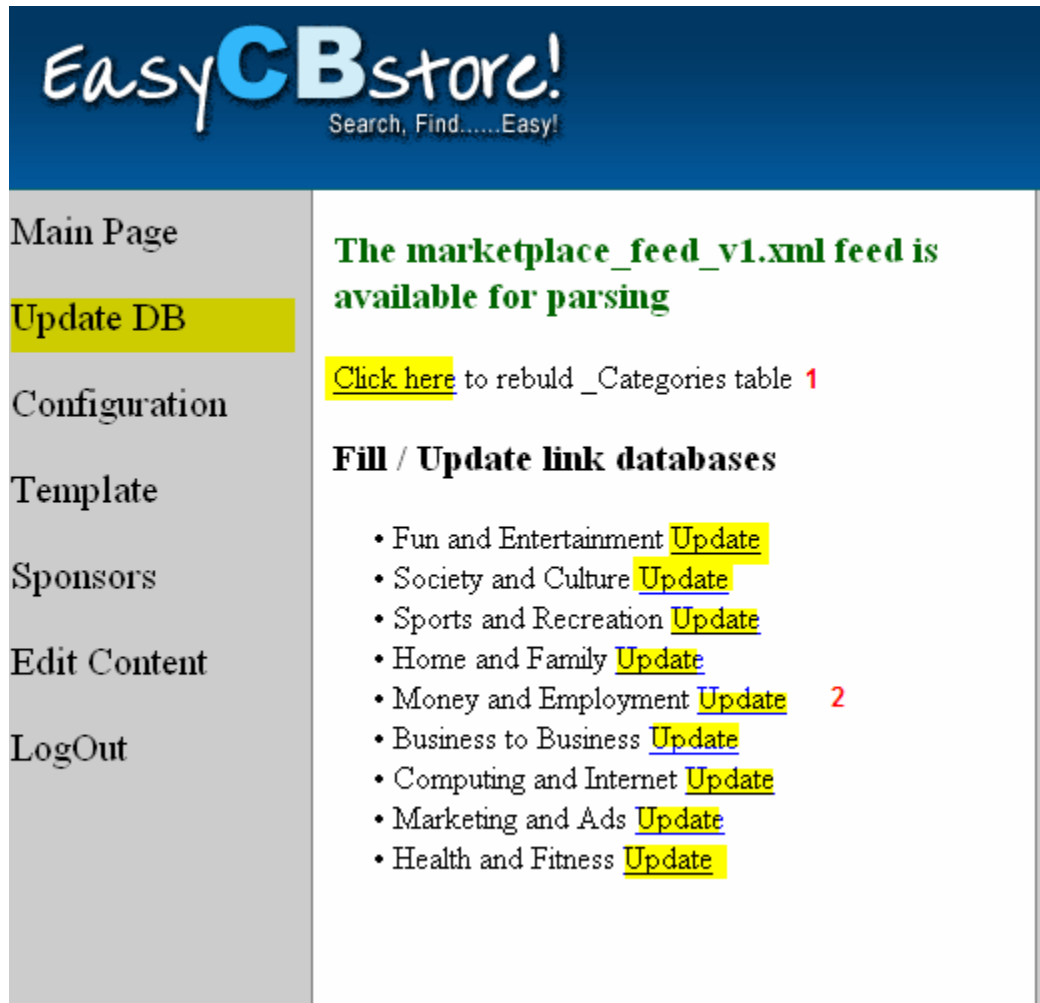

Filename	Filesize	Filetype	Date	Time	Permissions
..					
db		File Folder	03/06/2008	13:12	drwxr-xr-x
image		File Folder	03/06/2008	13:13	drwxr-xr-x

upgrade.php	9605	PHP File	03/06/2008	13:17	-rw-r--r--

Load your marketplace xml file into this folder.

If you cannot find an "xml" folder in your script's directory, then create one using your ftp program and upload both files into it.

Now that you have the marketplace xml file uploaded, return to your Admin panel's Update DB section.

You will then notice that the script have found the xml file in it's appropriate folder.

The screenshot shows the EasyCBstore! Admin Panel. The header is dark blue with the logo "EasyCBstore!" and the tagline "Search, Find.....Easy!". The left sidebar is grey and contains the following menu items: "Main Page", "Update DB" (highlighted in yellow), "Configuration", "Template", "Sponsors", "Edit Content", and "LogOut". The main content area is white and displays the following information:

- The marketplace_feed_v1.xml feed is available for parsing**
- [Click here](#) to rebuild _Categories table **1**
- Fill / Update link databases**
- A list of categories with "Update" links:
 - Fun and Entertainment [Update](#)
 - Society and Culture [Update](#)
 - Sports and Recreation [Update](#)
 - Home and Family [Update](#)
 - Money and Employment [Update](#) **2**
 - Business to Business [Update](#)
 - Computing and Internet [Update](#)
 - Marketing and Ads [Update](#)
 - Health and Fitness [Update](#)

First, you'll need to rebuild the categories table

Then click on each category "**Update**" links to update each category.

And that's it, your entire database have been updated to the latest.

Main Page Links Management

In this section of your admin panel, you can choose to enable or disable the links that will show on your homepage

The image shows the 'Main page links management' section of an admin panel on the left and a preview of the website homepage on the right. A red arrow points from the 'Publishing' link in the admin panel to the 'Business to Business' link in the homepage preview.

Editing Content (Link Text)

In this section you can edit individual link text. And you can also delete or add that particular link as a “Featured/Sponsored” links.

To edit links click on the dropdown window and select the category where the link is in and click the submit button:

Once you have done that you can see the page refresh with all the links and buttons to Edit/Delete/Add as sponsor.

Edit Content

Editing and deleting is self explanatory.

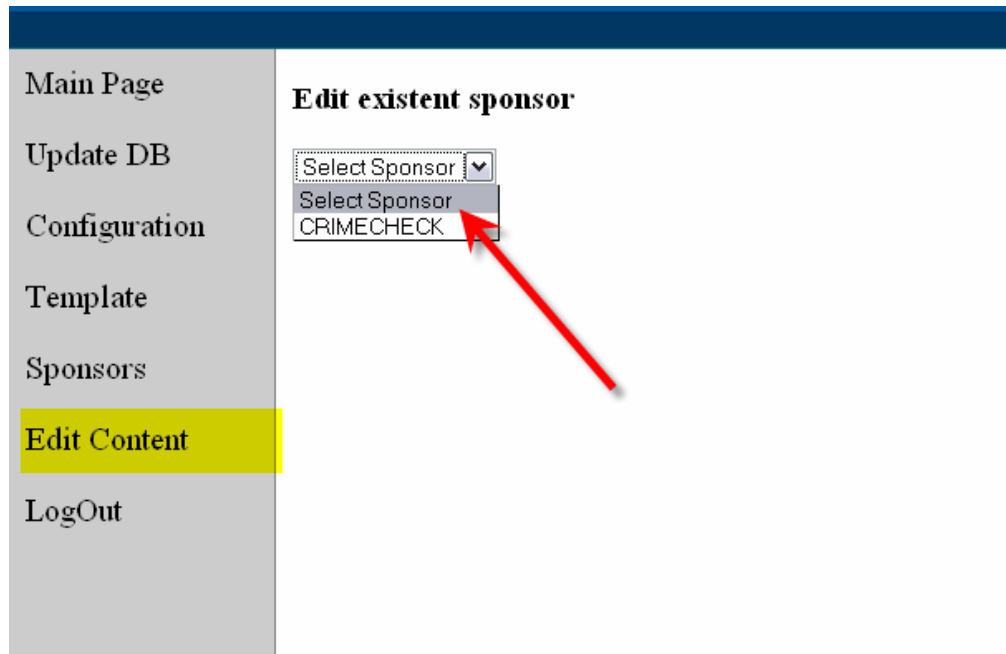

But once you add a link as a sponsor by clicking the "Add As Sponsor" button, that particular link will be automatically added to your sponsor section.

Sponsors

A sponsor is basically a featured link that you can choose to show in all your pages. You can do so easily by inserting a {sponsors_links} tag anywhere in your template. (See template section)

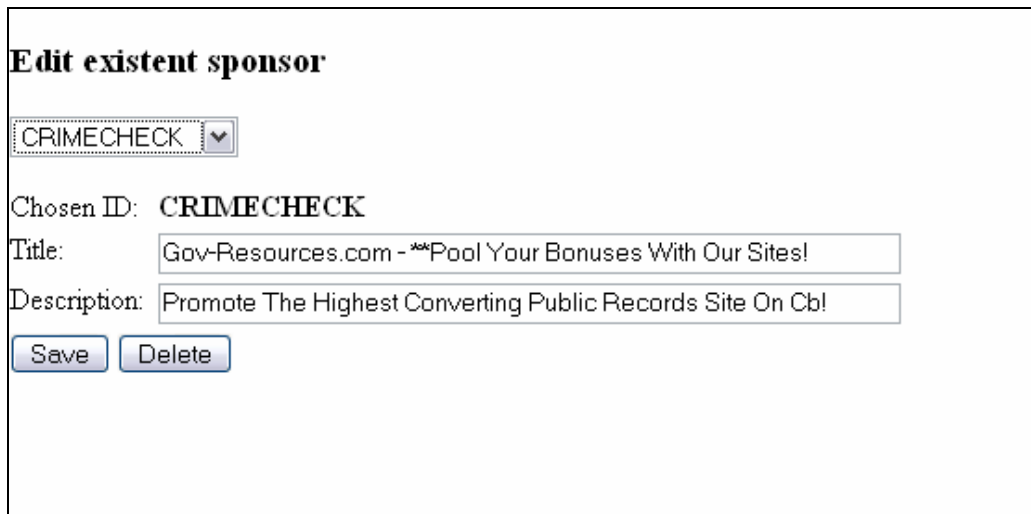

Once you have added a sponsor link from your content (See Editing Content), the ID to the link will show in this section.

Then all you need to do is select the ID from the dropdown window:

The screenshot shows a web interface with a sidebar on the left containing the following menu items: Main Page, Update DB, Configuration, Template, Sponsors, Edit Content (highlighted in yellow), and LogOut. The main content area is titled "Edit existent sponsor" and contains a dropdown menu labeled "Select Sponsor". The dropdown menu is open, showing the option "CRIMECHECK" selected. A red arrow points to the "CRIMECHECK" option in the dropdown.

and edit or remove the sponsor link.

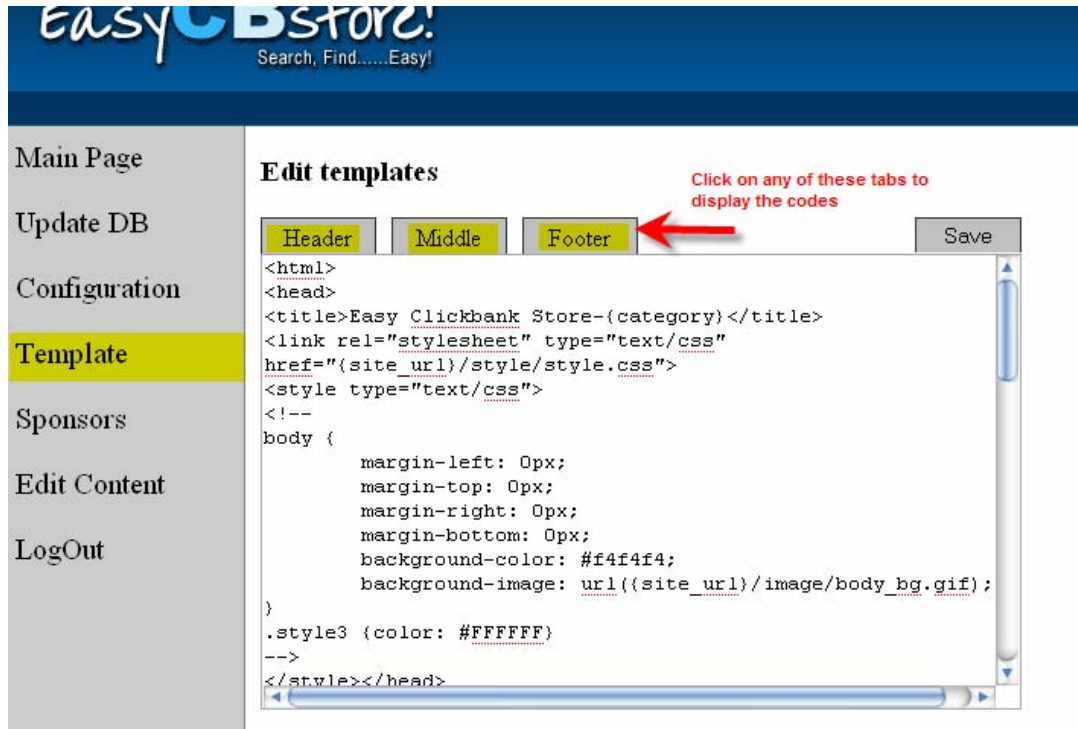

The screenshot shows the "Edit existent sponsor" form with the following details:

- Chosen ID:** CRIMECHECK
- Title:** Gov-Resources.com - ~~Not~~ Pool Your Bonuses With Our Sites!
- Description:** Promote The Highest Converting Public Records Site On Cb!
- Buttons:** Save, Delete

Templates

In the template section, you can edit your entire directory's appearance.

Usable Tags:

You can then insert any of these tags into any part of your templates to display:

{google_id}	Your Adsense ID
{site_url}	Full URL to the website
{sponsors_links}	Displays the links that you have chosen as a sponsor
{navigation}	Pathway Links
{sub_links}	All other sub category links under the main category
{pagination}	Page numbers for categories with more than 1 page
{category}	Category name
{main_links}	Product links

Remember to save each tab codes before moving to the next one.

That's it!

Most importantly, **always test every feature fully** before you use the product. This should always be carried out, no matter the script you are installing.
