

# Pay-Per-Click

## Ppc Appraisal

One of the lesser known money-makers uses an idea called Pay-Per-Click Websites (or, more simply, PPC sites). A PPC site is a search engine, much like Google or Yahoo!, which rank websites based on the search terms you enter. Using a membership subscription process, you can be paid for using them. The idea behind these websites is to promote their search engine to potential advertisers, so that they can make money. Because of the prevalence of Google, Yahoo!, and ask.com, the lesser known sites have to offer incentives to people who use their service so that they can compete. Their method is to pay users, often at about one-thousandth of a cent per click, to browse on their site, eventually paying the customer when their balance reaches around \$50. As I'm sure you can imagine, this takes a long time to build up, but once you automate your clicking, you can eventually work up a large sum of money and get a pretty big check. It can take awhile, but can be worth it if you spend a lot of time on the net already. The first step is to sign up for an account with one of the sites that tracks your usage. The more you sign up with the more money you can make. [This is the link to sign up.](#)

Simply sign up for a new account. When the site asks for your company, simply put your full name. For your tax ID, put 'n/a' and for your website, put 'www.ppcappraisal.com'. Sign up for any account name you please.

The next step is to download and install an automatic clicker. The only approved choice by PPC appraisal is the Ougo browser. You can download that [here](#).

If you don't have a Paypal account, you cannot get paid. To sign up with them go to [www.paypal.com](http://www.paypal.com) and become a member. The fill in fields are self-explanatory.

After you log in to PPC Appraisal's website, you need to click on the requests tab. Check the following boxes: Baltimore, Braintopia, Campaign, Cialto Art, Cockta, Cymicon, Joymars, Kazati.com portal, kili gaga, Medical health and fitness, NetVivid Portal and PPC Search engine. Do not select any others, or else it will take you years to get a check. Click the request bottom at the bottom of this page to continue.

Once you've made your requests, go to the "Menu" tab and find "Your link to rotation script for portals." Highlight the link inside this box, and press CTRL+C to copy. Now it's time to set up the browser. Install the Ougo Browser and go to the "Surf" Menu, clicking on Setup. Under Set1, paste (CTRL+V) the link into the panel on the right. That's all for setup.

To start the process, you need to start up the Ougo Browser whenever you go online. To start auto-surfing, and of course, making money, you simply go to "Surf" then "Start Surf" then "OK" when a pop up starts. You'll quickly see two windows pop up. This is fine, but to maximize your options, go to "Tools -> Developers ->Analyst -> Six" to open six windows, and triple your browsing powers. Now let the money roll in.

To get paid, you need to simply wait until you have enough credits with these websites. To check your current status, go to the PPC Appraisal website and sign in.

One option you probably want to turn on in Ougo is to send the browser to the tray when you click the minimize button. To do this, click Tools -> Ougo Browser Options -> Tray Options -> Enable Tray Icon ->Minimize to Tray.

Now, this alone will NOT make you any money whatsoever. It could take you months to earn enough for a single check, but you'd be losing money on electricity the whole time. You need to take you clicking business to the next step, or don't bother.

The way you do this is simple. You get referrals. You'll need a lot of them to make it work, but if you get one or two really intrepid adventurers, you can get up to \$10 or \$15 a day with minimal effort. You earn 5% of what each of your referrals makes by clicking, and 5% of their referrals down to the fourth level (i.e. you -> your referral -> their referral -> their referral). It can add up nicely if you do it right. Currently, I'm making about \$3 a day with four referral levels. Copy this note, and post it in your blog, or on message boards, changing out my referral addresses with yours, and there's some money to be made here. Keep clicking yourself so that you receive checks, otherwise that referral money will simply sit in your account. If you have an alternate address, like a P.O. Box or an office address, you can use those too. Refer yourself to yourself! Not a bad idea if you ask me. Refer everyone else from your second level account, and you instantly get twice the bonus on any future referrals.

Are there any dangers to doing this? No. It's completely legal, spyware free, and does very, very little to slow down your PC while it is running. Good luck!
