

Greetings

Thank you for your interest in Risk Radar® as we provide you this fully functional Demonstration Version of Risk Radar®. This single workstation version of Risk Radar demonstrates the capabilities of the application for a single user supporting one project. We are happy to provide Risk Radar® with this limited duration license so you can better understand its comprehensive capabilities supporting the Risk Management Framework. This desktop version has a similar look and feel of our Risk Radar Enterprise (RRE) application excluding the enterprise functionality. If a need exists for an web based application to support geographical dispersed teams working multi projects and with multi users then we would suggest you review Risk Radar Enterprise and request a live WebEx Demo.

Attached to this message please find your Risk Radar® Demonstration Version Release and Installation Notes which includes your software download and installation instructions. Your use of the Risk Radar® Demonstration Version is granted until 07/30/2014. Since this is a fully operational version of Risk Radar®, you are free to create your project, risks and reports as you see fit. Should you desire to keep using this version, just give us a call prior to the expiration of the temporary license and purchase it on your Visa or MasterCard for only \$575.00. At that point, we will provide you with a permanent, non-expiring license key which when installed in the application will permit you to continue using it without interruption. However, if you have not completed a purchase of Risk Radar® when the trial period has lapsed, the application will no longer function and you are expected to remove it from your workstation.

We have provided additional information for ordering Risk Radar® and Risk Radar Enterprise.

To download the Risk Radar® Demonstration Version file open the following link in a web browser:

<http://files.riskradarprogram.com/openupload/www/index.php?a=d&i=5575661801>

The Download Password is: rrv302 (it is case sensitive)
