## Correspond in your own handwriting from your computer. It's Easy!

- 1. Complete this handwriting sample form.** Print this file and follow the Instructions below.
- 2. Send your form to vLetter, inc.** Send **ONE** completed handwriting form (either US or EURO) and this Order Form to vLetter, inc. for processing via Postal Mail or eMail.
- 3. Your unique vLetter PRO is created.** Your handwriting style will be created by our highly trained designers. Your handwriting style will be shipped after thorough quality assurance testing. Normal processing time is 2 to 4 weeks, although 5-day Rush Processing is available. To obtain Rush Processing, check this option on your Order Form (48 hr. processing is also available, call for pricing and information.)
- 4. Install your font.** Install your new signature font using a simple install utility. Now you can add handwriting to your cards, letters and envelopes - without ever picking up a pen. Your handwriting will always be at its best!

### Instructions: vLetter PRO Handwriting Form

**1. Practice first.** The handwriting form includes 26 words. Some of these words are real and others could be. Together they include all of the letter combinations needed to create a contextual handwriting font. Make copies of the form and practice these words until you are comfortable writing them. Begin each word with a lower-case letter. Spelling is important!

**2. Use the right pen.** Use a pen which makes a fine, dark line, such as a rollerball or fibertip pen. **DO NOT use ballpoint pens or pencils as they will produce unwanted skips and blobs that will appear in your font.**

**3. Fill in the form completely.** The font will be created from the sample you provide. Fill out the form completely so that your font will have a complete set of characters.

**4. How to use the marks on the form as guides.** Write each word or group of characters in the spaces provided. Be careful not to let parts of letters cross over the corner brackets. Use the small dashes on the side of the brackets as base guidelines. Characters can be connected, disconnected, or a combination of both! Write corrections on unlined white paper and paste them over your mistakes if necessary.

**5. Write large for best results.** A longer word like "yachtque" should fill the width of the box provided. Write as large as you can naturally, but avoid writing over the corner brackets or over the printed words if possible.

kagvels

**6. Name your handwriting style.** Names can be three to seven alphabetic characters (no numbers, punctuation, or symbols).

**7. Sign your name in the Signature Box.** Write your signature the way you would normally sign a document. If you would like to use parts of your signature separately, be sure not to connect them with your pen. Our processing can accommodate up to four parts.

**8. Write the 26 words.** Begin them with lower-case letters.

**9. Write capital letters, punctuation, and numbers.** Please be sure to enter all characters listed.

**Capital letters:** In the US version of vLetter PRO, there are two alternates of each capital letter. You can make the first one block style and the second one script style & connected to the associated lower-case letter if you like. Your capital letters should be proportional to your lower-case letters.

**Punctuation:** Please enter all the punctuation listed in the lower half of the handwriting form along with the capital letters.

**Numbers:** Try to make your numbers consistent in size.

**10. Review your form.** Check for missing characters. Make sure your style is consistent throughout.

S So

**ABOVE ALL, WRITE NATURALLY in Printing or Cursive!** Your handwriting style will look just like your handwriting, BUT NEATER, because it will be more consistent. If you believe your handwriting is illegible, you will be surprised how a little consistency can help.
